

Infection Prevention

➤Date November 5, 2011

➤Purpose

To highlight healthcare breaches in Infection Prevention, focus on root causes, and leave with recommendations to prevent future infections by following guidelines set by multi societies.

➤Objectives

Upon successful completion of this course, the participants will be able to:

1. Explain detail of several well publicized infection control and instrument reprocessing breaches.
2. Discuss risk of infection associated with these breaches and miscellaneous reprocessing topics.
3. . Identify recommendations to prevent infection that could result from these breaches.
4. Discuss different risk assessments and the thresholds for patient notification.
5. Explain difference between each type of Hepatitis and how they are transmitted.
6. Define two complications of Hepatitis B & C.
7. Identify regulatory agencies that monitor infection prevention practices and breaches.
8. Discuss CMS Pay for Performance
